

Contents

	How to use this book	
	Preface	10
Introduction	Solid and filigree construction	13
MATERIALS – MODULES		
	Modules	
Introduction	The importance of the material	19
Properties of materials	The perception of architectural space	20
	The longevity of materials	21
	Masonry	
Introduction	The paths of masonry	22
Properties of materials	The materials	31
Systems	Masonry terminology	32
	Design and construction	33
	Masonry bonds	35
	Tying and reinforcing double-leaf masonry walls	39
Systems in architecture	The skill of masonry construction	40
	Types of construction	46
	Prefabrication	49
	Concrete	
Introduction	On the metaphysics of exposed concrete	56
Properties of materials	The materials	60
	The concreting process	63
	10 rules for the production of concrete	66
	Exposed concrete surfaces	67
Systems	Floor supports, exposed concrete with internal insulation	69
	The fixing of heavy external cladding (concrete)	70
	The fixing of heavy external cladding (stone)	71
	Chart for establishing preliminary size of reinforced concrete slabs	72
Systems in architecture	Linear structural members	73
	Systems with linear members	74
	Planar structural members	75
	Systems with planar structural members	76
	Timber	
Introduction	Wood: indifferent, synthetic, abstract – plastic	77
Properties of materials	The materials	82
	Wood-based products: Overview	84
	Wood-based products: Layered products	85
	Wood-based products: Particleboards	87
	Wood-based products: Fibreboards	88
	Important panel and prefabricated systems in Switzerland: Overview	89
	Panel construction: Current developments	94
Systems	Timber construction systems: Overview	96
	Platform frame construction: Construction principle	99
	Chart for establishing preliminary size of timber beams	103
Examples	Conversion of a trunk in traditional Japanese timber building culture	104
	The threads of the net	106
	Steel	
Introduction	Why steel?	113
Properties of materials	Sections – forms and applications	120
	Fire protection	122
	Potential applications for structural steelwork	123
Systems	Connections: A selection	124
	Structures – frame with cantilevering beams	126

Contents

	Structures – frame with continuous columns	128
	Structures – two-way frame	130
	Chart for establishing preliminary size of steel beams	132
Systems in architecture	Folding and bending	133
	Frames	134
	Girder, lattice beam and facade	135
	Space frames	136
	Diamonds and diagonals	137
	Canopy structures	138
	Insulation	
Introduction	The “invisible” building material	139
Properties of materials	Transparent thermal insulation	143
	Thermal insulation materials and their applications	144
Systems	Thermal insulation systems: Overview	146
	Glass or plastic	
Introduction	Glass – crystalline, amorphous	147
	Plastic	150
Properties of materials	Glass, the opaque building material	151
	Plastic on the threshold of architecture	159
	ELEMENTS	
	Foundation – Plinth	
Introduction	Building underground	169
Processes	Site preparation: Surveying work	177
	Site preparation: Earthworks	178
	Foundations	179
Systems	Foundation schemes: Loadbearing layer inside	180
	Foundation schemes: Loadbearing layer outside	181
Systems in architecture	The basis for plinths	182
Building performance issues	External wall below ground: Influences on the building envelope	185
	Facade	
Introduction	The wall	186
Systems in architecture	The design of the facade	191
	Opening	
Introduction	For and against the long horizontal window:	
	The Perret – Le Corbusier controversy	200
Systems	The window – opening package	209
	Position of window, opening rebate forms	210
	The window as a component – frame sections	211
	The window as a component – glass	212
	Window – horizontal section, 1:1	213
	Window – vertical section, 1:1	215
Systems in architecture	The opening as a hole	217
	The opening as a horizontal strip	218
	The opening as a joint	219
	The opening as a transparent wall	220
Introduction	About the door	221
Systems	Doors – types of opening	222
	Doors – types of door stop	223
	Doors – hardware	224
Building performance issues	Wall – opening: Influences on the building envelope	225
	Cutting out sunlight and glare	226

	Floor	
Introduction	The doubling of the sky	230
	Roof	
Introduction	The roof	236
Systems	Pitched roof: Functions of layers	238
	Flat roof: Functions of layers	239
	Flat roof: Warm deck – conventional systems	240
	Flat roof: Warm deck – special systems	241
	Flat roof: Upside-down roof	242
	Flat roof: Cold deck	243
Systems in architecture	Pitched roof	244
	Flat roof	245
	The roof as a folded plate	246
	Barrel-vault roof and shell roof	247
Building performance issues	Criteria and relationships	248
	Flat roof – pitched roof: Repercussions for the building envelope	249
	Stairs, lifts	
Introduction	Flights of fancy	250
Systems	Excerpt from the <i>Bauentwurfslehre</i> by Ernst Neufert	255
	The geometry of stair transitions	257
	Balustrades and spandrel panels: Extract from Swiss standard SIA 358, 1996 edition	258
Systems in architecture	Lifts	259
	The staircase as an assembly of simply supported beams	263
	The staircase as a monolithic, organic form	264
	The staircase as a space frame	265
	The staircase as a solid timber construction	266
	STRUCTURES	
	Forms of construction	
Introduction	Courtyard house versus veranda house	269
	An attempt to classify horizontal and vertical space development	277
	Structural shell, fitting-out and premium structural shell	288
	Structural issues: The relationship between interior structure, loadbearing structure, and infrastructure	296
Concepts	Vertical loadbearing structures in solid construction: Cross-section concepts	304
	Vertical loadbearing structures in solid construction: Plan concepts	305
	Vaulted loadbearing structures in solid construction: Compression structures	306
Examples	Of heavy mass and apparent heaviness	308
	Ksar Ferich: A fortified storehouse in southern Tunisia	311
	Sculpted architecture: The Scottish tower house	316
Processes	Provision of services during planning work	324
	The sequence of building operations	325
Systems	Compartmentation	326
	Box frame construction	327
	Frame construction	328
	Column-and-slab systems	329
	Single-storey shed forms	330
Systems in architecture	Prefabrication: System building	331
	Building performance, energy	
Introduction	Sustainability: Fundamentals of architecture	335
Concepts	The problem of heat flow and vapour diffusion	339

Contents

	Insulation concepts: Diagram of layers	340
	Insulation concepts: Complementary systems – loadbearing layer inside	341
	Insulation concepts: Complementary systems – loadbearing layer outside	342
	Seven rules for the design of a low-energy house	343
Example	Low-tech – high tectonics	344

BUILDINGS Selected projects

Examples	Apartment blocks, Martinsbergstrasse, Baden: Burkard Meyer Architekten	349
	Gallery for Contemporary Art, Marktoberdorf: Bearth + Deplazes	359
	Detached family home, Grabs: Peter Märkli	368
	Paspels School: Valerio Olgiati	378
	Volta School, Basel: Miller + Maranta	387
	Sihlhof School, Zurich: Giuliani Hönger	396
	Training centre, Gordola: Durisch + Noll	407
	New Monte Rosa Hut: Monte Rosa Studio (ETH Zurich), Bearth + Deplazes	414
	Vocational Training Centre, Baden: Burkard Meyer Architekten	426
	Teacher Training College, Chur: Bearth + Deplazes	434
	Swiss School of Engineering for the Wood Industry, Biel: Meili + Peter	443
	Private house, Sevgein: Bearth + Deplazes	454
	Leutschenbach School, Zurich: Christian Kerez	459
	Office building, Picassoplatz, Basel: Peter Märkli	469

COMPONENTS Drawings

	Preparation of drawings for buildings: Excerpt from Swiss standard SIA 400:2000	479
	Presentation on drawings: Example: timber platform frame construction	485
	Symbols: Legend for the catalogue of components	487

Foundation – Plinth

	Single-leaf masonry	488
	Double-leaf masonry, rendered	489
	Facing masonry	490
	Fair-face concrete with internal insulation	491
	External insulation, rendered	492
	External cladding, lightweight	493
	External cladding, heavyweight	494
	Timber platform frame construction	495
	Solid timber panel construction: Plinth – Roof	496

Wall – Floor

	Single-leaf masonry, rendered	498
	Double-leaf masonry, rendered	499
	Facing masonry	500
	Fair-face concrete with internal insulation	501
	External insulation, rendered	502
	External cladding, lightweight	503
	External cladding, heavyweight	504
	Non-loadbearing external wall	505
	Timber platform frame construction	506
	Solid timber panel construction	507

	Opening	
Windows	Single-leaf masonry	508
	Double-leaf masonry, rendered	510
	Facing masonry	512
	Fair-face concrete with internal insulation	514
	External cladding, lightweight	516
	External cladding, heavyweight	518
	External insulation, rendered	520
	Non-loadbearing external wall	522
	Timber platform frame construction	524
	Solid timber panel construction	526
Doors	Hinged door, external – wood	528
	Hinged door, external – wood/glass	529
	Sliding door, external – metal/glass	530
	Hinged door, internal – wood	531
	Sliding door, internal – wood	532
	Floor	
	Hollow clay block floor	533
	Hourdis-type hollow clay block floor	534
	Solid concrete slab	535
	Ribbed concrete slab	536
	Concrete waffle slab	537
	Hollow-core concrete slab	538
	Composite slab, profiled metal sheeting–concrete	539
	Solid timber floor	540
	Timber joist floor	541
	Timber box element floor	542
	Steel floor	543
	Roof – Parapet	
	Pitched roof – warm deck:	
	Fibre-cement – external cladding, lightweight	544
	Pitched roof – warm deck, monopitch roof:	
	Fibre-cement – facing masonry	545
	Pitched roof – cold deck: Roof tiles – masonry in brickwork bond	546
	Pitched roof – cold deck: Sheet metal – single-leaf masonry	547
	Flat roof – warm deck: Bitumen – double-leaf masonry, rendered	548
	Flat roof – warm deck:	
	Bitumen – fair-face concrete with internal insulation	549
	Flat roof – warm deck: Plastics – external cladding, heavyweight	550
	Flat roof – warm deck: Bitumen – non-loadbearing external wall	551
	Flat roof – upside-down roof: Bitumen – external insulation, rendered	552
	Flat roof – cold deck, uncoated roof:	
	Bitumen – timber platform frame construction	553
	Flat roof – warm deck, suitable/unsuitable for foot traffic	554
	Flat roof – cold deck	556
	Flat roof – upside-down roof, with rooftop planting	558
	EXTENSION	
	Views on Climate	
	Behavioural studies	563
	The climate zone model	566
	The temperate zones: A conflict of objectives	571
Conclusions	Impact and effort	576
	APPENDIX	
	Further reading	587
	Picture credits	582
	Index	597
